A mobile application interface for a registration page. The screen is framed by a grey border. At the top, a status bar shows the time '09:52 AM' and icons for cellular signal, Wi-Fi, and battery. Below the status bar is a white 'Navbar' section with the word 'Navbar' in black text and a hamburger menu icon (three horizontal lines) on the right. A horizontal line separates the navbar from the main content area. The main content area has a white background and features the word 'Register' in a large, bold, black font. Below this title is a large, rounded rectangular box with a black border. Inside this box, there are two identical registration fields. Each field consists of a black scribbled line representing a label, followed by a white rectangular input field with a black border. Below the registration box, there is a blue text link that says 'a link' with a small underline. At the bottom of the screen, a white 'Footer' section is separated from the main content by a horizontal line, containing the word 'Footer' in black text.
